Medical & NHS Displays

Examples

In a situation where patients are waiting for a clinic or to see a practitioner an LED display is a crucial means of keeping patients updated and queues managed. From elaborate call forward systems to simple message displays an LED display becomes a focal point for patient communication. In busy NHS Trusts these displays can be used in training situations directing students to seminars and training courses.

Right: message display used in a training environment to direct students and provide info for each course

Medical & NHS Displays

Operation

Below: LED Displays in Doctors Waiting Rooms providing patient call and general up to date information

OPERATION

LEDsynergy LED System Displays are easily programmable, with various methods of operation to suit almost any application. The displays can be linked to the patient appointment software.

LEDsynergy LED System Displays can also be programmed from remote locations using PC's and Windows Compatible Software.

The displays can be connected to PC's in various ways:

- Connected directly to a PC's Serial Communication Port
- Via dial-up modem
- Over Ethernet TCP/IP network

Messages are edited/ composed on PC and then downloaded or sent to the display.

about us

As an established leader in the UK for electronic message display signs and with 40 years experience in the business of supplying programmable LED signs and LED displays, you can be sure that we'll give you the right advice and excellent service, these are the values that we hold dear.
