Single to Multi Line Text Displays

Getting Your Message Out There!

An LED text display is the simplest and most effective way of displaying a message, from warnings to information, it is versatile and effective. With various screen pitch and resolutions you can use the LED displays to inform your public with whatever information you choose. Our full colour displays can be used imaginatively with text, alongside images and animation, giving you a very versatile and eye catching communication tool.

Our full colour text displays can show varying information in different colours giving emphasis where needed.

Single to Multi Line Text Displays

In a Powerful & Effective Way

Shown here are some examples of LED external text displays used in applications where information is constantly being shown to the public with the need to update current news, waiting times or cinema showings both quickly and efficiently.

The LED displays are linked to a PC either by LAN network or remotely by Wi-Fi/modem for ease of updating from our LED display software. We have standard software packages for several applications or we can create a bespoke package if your application requires something more unusual.

Single to Multi Line Text Displays

Keeping People Informed

Various examples of LED text displays in different formats keeping the public informed of events, news, information and scores!

Single to Multi Line Text Displays

Our Range of Standard LED Displays

Our extensive range of standard full colour LED displays are available with an LED pitch (centres of LEDs) of 3mm, 4mm, 6mm and 10mm and many varying resolutions. They all have the capability to show informational text on the displays with varying text heights in any colour along with images and animation.

A small selection are shown below, please contact us if you would like the full leaflet for our standard displays.

Single to Multi Line Text Displays

Safeguarding Visitors and Personnel

We are an approved supplier to the military and have installed many entrance displays up and down the country to military bases both at the gate entrance and around the base all using LED text displays.

These LED text signs are informational, showing anything from status, visitors information to road directions or weather conditions.

Single to Multi Line Text Displays

Safeguarding Visitors and Personnel

Health and Safety information is of paramount importance and it is a high priority to inform visitors and staff of potential hazards and situations.

LED displays can display text along with a pictorial image as left.

Single to Multi Line Text Displays

Many Applications for Text Displays

LED text displays can be used for many uses and applications, for information use, sculptural use and promotional use as shown in these examples below.

Single to Multi Line Text Displays

Bespoke Text Displays

Taking our standard text displays we can adapt it to fit in a bespoke design display, whether it's a unique casing or running the text vertically the displays are extremely versatile.

You can see some examples of some previous projects which may help inspire your imagination and creativity to use the simple text displays in a completely bespoke way.

Single to Multi Line Text Displays

Simple Text Displays

If budget is limiting or if your requirement is simple then often a simple text display fits the bill and does the job! Whether it is a single, bi-line or multi line display text can be displayed clearly and efficiently. Shown below are many different types of simple displays.

Some of these examples show how you can vary the height of texts within the same message.

Simple Text Displays

OPERATION

LEDsynergy LED System Displays are easily programmable, with various methods of operation to suit almost any application.

PC Operation

LEDsynergy LED System Displays can be programmed using PC's and Windows Compatible Software.

The displays can be connected to PC's in various ways:

- Connected directly to a PC's Serial Communication Port
- Over Ethernet TCP/IP network

Messages are edited/ composed on PC and then downloaded or sent to the display.

POPULAR COMMUNICATION OPTIONS *(Many others are available)*

- | | |
|-------------------|---|
| RS232 – | Connected directly to the serial communication port of a PC. The cabling is limited to a maximum of 50 meters between the PC and the display. RS232 is suitable for single display applications with short cable lengths. |
| RS485 – | Connected to the serial communication port of a PC via a RS232 to RS485 converter. Suitable for use in connecting many signs together on the same cable with no conflicts, in electrically noisy environments. |
| Ethernet – | Connected directly into a TCP/IP Ethernet network, and assigned its own IP address. Suitable for use where there is an existing network infrastructure. |
| Modem – | Connected directly to a modem that answers an incoming call from the PC operator, and will disconnect after the message has been transmitted.
Suitable for use where there is an existing telephone line and other communication options are unsuitable. |

about us

As an established leader in the UK for electronic message display signs and with 40 years experience in the business of supplying programmable LED signs and LED displays, you can be sure that we'll give you the right advice and excellent service, these are the values that we hold dear.

We accept most major credit and debit cards

"This huge sign caused great excitement at the start of the new Millennium, with welcoming messages uploaded from around the world it brought the year 2000 in with a bang!" *Reuters*

"Thank you for all your help in the installation of the Help Desk Control system. The system has been up and running for over a year, and surpassed the trial findings. We were able to achieve a complete system payback within 6 months."

Tony Lawrence (Technical Support Manager) - Lloyds TSB

"The LED displays have proved invaluable in enabling us to direct large numbers of personnel quickly and efficiently throughout the building. Reliability is paramount in our facility and the led displays have performed faultlessly, I would not hesitate in recommending them."

Lez Smith (Head of Security) Citigroup
