

LED Screens in Shopping Malls

Scope of LEDs in Shopping Malls

More and more Shopping Centres are recognising the value in owning their own LED screens, rather than following the advertising-led model of third party ownership, both in terms of profitability and control.

By considering capitol costs over the course of the lifecycle of LED screens, venues can not only derive increased value and more favourable split of advertising sales, but also gain editorial control over content, creating a far more flexible and valuable platform.

In Shopping Malls LED screens:

- Give maximum impact for Advertising
- Are eye catching with stunning graphics
- Show promotions and offers
- Are state of the art
- Can create powerful visual effects
