about LEDsynergy

**No-nonsense | good advice
great service | quality products**

You want to know that your electronic signs suppliers are up to the job. We are and here are some reasons why...

1. Superb quality products

We've been designing, making and commissioning programmable LED and LCD Signs for over 40 years, quite frankly, we know what we're doing! We have done nearly 20,000 installations in that time and continually get repeat business from our clients. We're very proud of our track record and excellent product quality.

2. Good value for money

Probably we are not the cheapest supplier of LED and LCD signs; that's because we make sure that we use high quality components for our electronic signs. And we take care to design products and software that are effective and reliable. What's more we carefully monitor product quality. If you are comparing prices and simply looking for the cheapest quote, we might not be the supplier for you, but be careful on the quality that you are buying if you choose just on price alone! But we are always happy to chat about your needs.

3. A passion for excellence

We are passionate about what we do and about doing it well. We want to please our customers so we'll take the time to understand your needs and build a display system that meets them. We also make sure that we do things right first time.

4. Superb customer service

Ask our customers about us and they will tell you that we go out of our way to deliver. We don't rest on our laurels; we know that we are only as good as our last job. So we make sure that every one of our customers is satisfied with the LED / LCD product we deliver and the service we provide.

5. Satisfaction guaranteed

You need to be able to trust us – and you can. Firstly, because of our experience; secondly, because we listen to your needs and work with you find a solution that works for you. Don't forget that our products have a two year warranty.

6. Installation service

We'll install and set up your signs for you. This ranges from simple "plug and play" set ups to full structural installations. Our skilled engineers are there to help you get your sign up and running when you need it to be. And, of course, we'll help you make sure that your operator knows how to make the sign work.

7. Support every step of the way

You're in very good hands. Our support starts when you make your first enquiry and extends well beyond the delivery of the display. We don't charge for telephone support after the sale. Product failures are rare, but if it happens we'll jump around to help you diagnose the problem and put things right.

8. Competent people

We recruit the best people and make sure they stay up to date with this fast changing field. Our people know what they are doing and are able to respond to your needs efficiently and effectively.

9. Frank and honest

We will tell you the truth and won't ever try to sell you anything that doesn't represent good value for money. For example, we won't try to sell you an unnecessary warranty extension or LED display that are too expensive for your needs. You'll find our no-nonsense approach to business refreshing, there's certainly no hard sell here, just honest advice!

LCD Screens

LCD screens have a wide variety of applications, not least in the field of commerce. As an extremely powerful communication tool when deployed as either a single screen or a multi-screen video wall, businesses from all sectors are provided with a multi-purpose sales and information facility with an LCD screen.

The commercial applications for LCD screens are almost endless.

Shopping Malls

Shopping centers and malls are large, noisy buildings with an awful lot going on at the same time. Traditional types of advertising can get lost amongst all this noise, but LCD screens are perfect

for grabbing the attention of shoppers. Whether used to show directions, display public announcements or special offers, LCD screens are the perfect solution.

Reception Areas

Commercial reception areas are the front window of any business and LCD screens offer a sophisticated, professional way of displaying important information for visitors. LCD screens are so useful and informative that they can even be employed in place of much more costly reception staff. LEDsynergy offers some of the best screens in the world to ensure that the first impressions always count for a business.

LCD screens are an ideal addition to reception areas giving you a medium to convey information, videos and images

Conference Rooms

If you're fed up with the hassle of using outdated overhead projectors and slides for your conference room presentations, LCD screens are the ideal enhancement. Once installed your LCD screen can be linked up to your laptop or smartphone to provide your attendees with a vivid, punchy and eye-catching presentation.

Offices

The office is another environment that can benefit from the installation of an LCD screen, combining notice board facilities, with a presentation platform and a constantly updated news feed. LCD screens can also be used in workplaces like call centres to display real-time performance data in a clear and distinct way.

Hotels & Hospitality

Another commercial setting that LCD screens are useful in is hotels and hospitality. When you want to convey a large amount of information and advertising to customers, the LEDsynergy team has the necessary experience to deal with multiple installations required to fit out hotels.

Indoor Totem Displays with integral LCD screens are ideal for advertising and conveying information to potential customers

Wall Mounted Screens

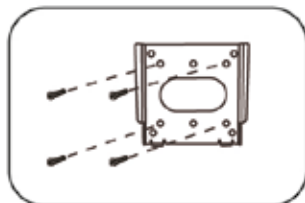

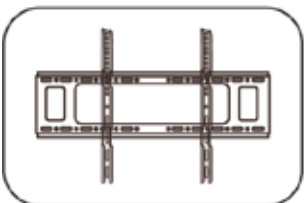

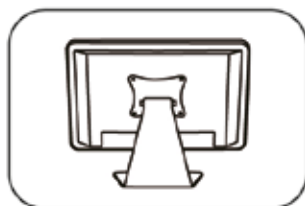

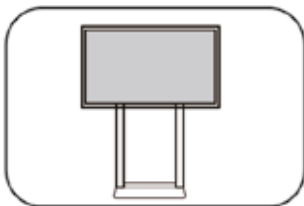

These internal wall mounted screens are ideal for environments where continual information needs to be portrayed to a large number of people and where the information shown is being constantly updated. Such as information or advertising. They are available in many different sizes and can be installed in many ways.

SMWE817

The screens can be positioned in a landscape or portrait format and can be installed in a number of ways.

Screen Size available: 32" 43", 49" 55" 65" 75" 85"

Various Brackets

SMWE801

**Screen Size available:
21.5" 32" 43" 49" 55" 65"**

Freestanding Screens

Like the wall mounted screens, these stand alone totem LCD displays are an excellent means of communicating vast amounts of information. The displays can, however, be moved to wherever they are needed and can be positioned prominently to capture the attention. Many formats are available.

SMWE813 Screen Size available: 32" 43" 49" 55" 65" 75" 85"

SMWE955

SMWE867

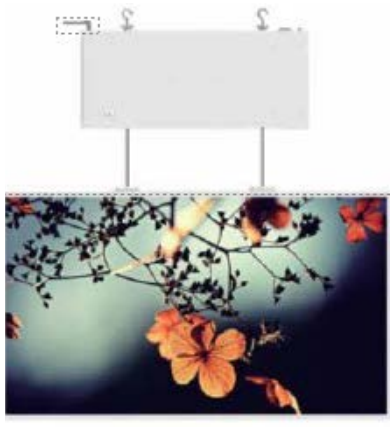

SMWE956

SMWE906

There are many various options of totem design with an integrated LCD screen.

Window Screens

Our single and double sided slim window advertising digital screens work very well in the retail environment, displaying adverts and such to consumers inside and outside the shop or showroom. There are 3 options of screens all as detailed below, all can be used in landscape or portrait format and all screens are full HD - 1920 x 1080 pixels.

General Information

Find your screen size and you can see the dimensions of the LCD screen. As well as our information on the Media Player that we tend to use with our LCD screens and general information about the Cloud service available.

LCD Screen Sizes

Here you can see how the sizes of screen compare to one another. The general ratio of our LCD screens are in a 16:9 format with a resolution of 1920 x 1080 pixels, although some do vary. Use this comparison as a general rule of thumb.

32 inch -	698mm x 392mm
43 inch -	927mm x 521mm
46 inch -	1018mm x 572mm
55 inch -	1209mm x 680mm
65 inch -	1428mm x 803mm
75 inch -	1649mm x 928mm
84 inch -	1877mm x 1067mm

These sizes are approximate and further clarification of specific sizes for each LCD screen can be obtained by contacting us.

Many other sizes are available - please ask for details.

Media Player

Introducing Our Digital Signage Media Player: Unleash the Power of Visual Communication

Experience the future of dynamic visual communication with our cutting-edge digital signage media player. Designed to effortlessly deliver stunning images, captivating videos, and interactive content, this state-of-the-art device seamlessly integrates with your LEDsynergy LCD or LED digital signage screens. Whether you opt for a stand-alone media player or one embedded within the display itself, our solution

empowers you to engage your audience like never before.

To unlock the full potential of your digital signage network, our media players seamlessly integrate with our advanced content management system (CMS). Our CMS acts as the command centre for scheduling, playback, and content delivery to the media players. With this powerful combination, you gain complete control over your digital signage ecosystem, ensuring flawless execution and captivating experiences.

Cloud

Introducing LEDsynergy's Custom-Designed Players and Cloud System

At LEDsynergy, we go the extra mile to provide you with the perfect solution. Our team has meticulously designed our own digital signage media players in conjunction with our innovative CLOUD system. With our custom-designed players and advanced cloud-based technology, you gain unparalleled control and flexibility over your digital signage network. It's time to take your system to new heights and deliver captivating experiences to your audience.

Embrace the power of visual communication and transform your business with our state-of-the-art digital signage media player. Experience seamless integration, advanced content management, and total control over your system. Discover the future of digital signage today with LEDsynergy.

British built - affordable satisfaction guaranteed

What we do

As an **established leader in the UK** with over 40 years experience in the business of supplying programmable LED and LCD screens and displays, you can be sure that we'll give you the right advice and excellent service, these are the values that we hold dear.
